

VESTRA

v4.0.0 — World-Class System Guide

AI-Powered Real Estate Ecosystem for Africa — Ready for Apple Store & Google Play

Property	Value
System Version	4.0.0 (World-Class)
Generated	June 21, 2026
Backend	FastAPI + PostgreSQL 16 + Redis 7
Frontend	Next.js 16 + React 19 + TypeScript 5
Payments	6 Providers (M-Pesa, Stripe, PayPal, Bank, Airtel, Crypto)
Languages	English + Kiswahili (i18n)
PWA	iOS + Android Installable
Tests	105 Unit + 14 E2E
CI/CD	GitHub Actions Auto-Deploy
Support	support@vestra.co.ke

1. System Overview

VESTRA is the world's most advanced AI-powered real estate ecosystem, built for Kenya and Africa. It combines blockchain-like title verification, 6 payment providers, real-time WebSocket communication, bilingual Swahili/English support, AI price estimation, and native mobile apps into one unified platform.

Tech Stack

Layer	Technology	Version
Backend	FastAPI (Python 3.12)	0.115+
Frontend	Next.js (React 19)	16.2.9
Database	PostgreSQL	16 Alpine
Cache	Redis	7 Alpine
Proxy	Nginx	1.27
Real-time	WebSockets (FastAPI native)	—
AI Engine	Vestra AI + Vestima™	Custom
Mobile	Capacitor.js	6.x
Payments	6 providers	Multi
Monitoring	Prometheus + Grafana	Latest
CI/CD	GitHub Actions	—
Testing	Pytest + Playwright + k6	—

2. Quick Start

Prerequisites

- Python 3.12+
- Node.js 20+
- PostgreSQL 16
- Redis 7
- Docker (optional)

Local Development

```
cd vestra/backend python -m venv venv && venv\Scripts\activate pip install -r requirements.txt cp .env .env.local # Edit SECRET_KEY alembic upgrade head python -m uvicorn app.main:app --host 0.0.0.0 --port 8000 --reload cd vestra/frontend-build npm install cp .env.example .env.local npm run dev # Open http://localhost:3000
```

Docker Production

```
cd vestra docker-compose build docker-compose up -d docker-compose exec backend alembic upgrade head curl http://localhost/health
```

3. All Credentials & Environment Variables

Fill in ALL values marked REQUIRED before deploying to production.

Database

Variable	Description	Value
DATABASE_URL	PostgreSQL connection	postgresql+asyncpg://...
DATABASE_POOL_SIZE	Connection pool	20

Redis

Variable	Description	Value
REDIS_URL	Redis connection	redis://localhost:6379/0
REDIS_PASSWORD	REQUIRED in production	Strong password

Auth

Variable	Description	Value
JWT_SECRET_KEY	REQUIRED - 64+ chars	python -c "import secrets; print(secrets.token_hex(32))"
JWT_ENCRYPTION_KEY	REQUIRED - Fernet key	python -c "from cryptography.fernet import Fernet; print(Fernet.generate_key().hex())"

M-Pesa

Variable	Description	Value
M_PESA_CONSUMER_KEY	Daraja API key	From developer.safaricom.co.ke
M_PESA_CONSUMER_SECRET	Daraja API secret	From developer.safaricom.co.ke
M_PESA_SHORTCODE	Business shortcode	174379 (sandbox)
M_PESA_PASSKEY	STK passkey	bfb279f9aa9bdbcf...
M_PESA_ENV	sandbox production	sandbox

Stripe

Variable	Description	Value
STRIPE_SECRET_KEY	REQUIRED	From dashboard.stripe.com
STRIPE_WEBHOOK_SECRET	Webhook signing	From Stripe Webhooks

PayPal

Variable	Description	Value
PAYPAL_CLIENT_ID	REST API client	From developer.paypal.com
PAYPAL_CLIENT_SECRET	REST API secret	From developer.paypal.com
PAYPAL_ENV	sandbox live	sandbox

Bank Transfer

Variable	Description	Value
NK_ACCOUNT_NAME	Account holder	Vestra Technologies Ltd
NK_ACCOUNT_NUMBER_KCB	KCB account	
NK_ACCOUNT_NUMBER_EQUITY	Equity account	
NK_ACCOUNT_NUMBER_COOP	Co-op account	
NK_ACCOUNT_NUMBER_NCBA	NCBA account	
NK_ACCOUNT_NUMBER_ABSA	Absa account	

Cryptocurrency

Variable	Description	Value
YPTO_WALLET_ADDRESS_USDT	Polygon USDT wallet	
YPTO_RPC_URL	RPC endpoint	https://polygon-rpc.com
YPTO_ENABLED	Enable crypto	false

Airtel Money

Variable	Description	Value
ARTEL_CLIENT_ID	API client ID	
ARTEL_CLIENT_SECRET	API secret	
ARTEL_ENV	sandbox production	sandbox

WhatsApp

Variable	Description	Value
WATSAPP_PHONE_NUMBER_ID	Phone number ID	
WATSAPP_ACCESS_TOKEN	Permanent token	

Email

Variable	Description	Value
SMTP_HOST	SMTP server	smtp.gmail.com
SMTP_PORT	Port	587
SMTP_USER	Username	
SMTP_PASSWORD	App password	

Security

Variable	Description	Value
FRONTSTILE_SECRET_KEY	CAPTCHA secret	
FRONTSTILE_SITE_KEY	CAPTCHA site key	
SESSION_IDLE_TIMEOUT_MINUTES	Auto-logout	30

4. Demo Accounts

All passwords: **demo1234**

Role	Email	Name
Super Admin	admin@vestra.co.ke	Admin User
Agent	jane.muthoni@email.com	Jane Muthoni
Buyer	samuel.njoroge@email.com	Samuel Njoroge
Seller	peter.omondi@email.com	Peter Omondi
Landlord	grace.akinyi@email.com	Grace Akinyi

5. Deployment Guide

Docker Production

```
# Fill ALL env vars cd vestra docker-compose build docker-compose up -d # Run migrations
docker-compose exec backend alembic upgrade head # Verify curl http://localhost/health curl
http://localhost/metrics # Check logs docker-compose logs -f backend
```

Cloud Platforms

Platform	Config File	Command
Fly.io	fly.toml	flyctl deploy
Railway	railway.json	railway up
Render	render.yaml	Git push auto-deploy

6. System Architecture

Docker Services (12)

Service	Role	Port
postgres	Primary database	5432
redis	Cache, sessions, rate limiting	6379
backend	FastAPI app server	8000
frontend	Next.js server	3000
nginx	Reverse proxy + SSL	80/443
prometheus	Metrics collection	9090
grafana	Dashboards	3001
alertmanager	Alert routing	9093

Security Layers

- JWT with IP binding + refresh token rotation
- TOTP 2FA with QR code setup
- CSRF double-submit cookie pattern
- Rate limiting: Redis sliding window (10/min auth, 120/min general)
- Account lockout: 5 failures = 15-min lock via Redis
- M-Pesa callback: IP whitelist + HMAC + Redis replay protection
- Data encryption at rest (Fernet) for PII
- CSP, HSTS, X-Frame-Options, Referrer-Policy headers
- GDPR: data export + right-to-be-forgotten

7. API Reference

Auth (22 endpoints)

- POST /auth/register
- POST /auth/login
- POST /auth/logout
- POST /auth/refresh
- GET /auth/me
- PUT /auth/me
- POST /auth/change-password
- POST /auth/forgot-password
- POST /auth/reset-password
- POST /auth/verify-email
- POST /auth/resend-verification
- POST /auth/send-otp
- POST /auth/verify-otp
- POST /auth/upgrade-role
- POST /auth/2fa/setup
- POST /auth/2fa/verify
- POST /auth/2fa/disable
- GET /auth/sessions
- DELETE /auth/sessions/{id}
- GET /auth/referral-code
- GET /auth/user/export
- DELETE /auth/user/data

Properties (12)

- POST /properties
- GET /properties
- GET /properties/ai-search
- GET /properties/my
- GET /properties/{id}
- GET /properties/{id}/seo
- PUT /properties/{id}
- DELETE /properties/{id}
- POST /properties/{id}/publish
- POST /properties/{id}/feature
- GET /properties/listing-fee/info

Payments (14 - 6 providers)

- POST /payments/mpesa/initiate
- POST /payments/mpesa/callback
- GET /payments/status/{id}
- GET /payments/my
- POST /payments/stripe/callback

- POST /payments/{id}/refund
- POST /payments/initiate/paypal
- POST /payments/paypal/callback
- POST /payments/initiate/bank
- POST /payments/bank/confirm
- POST /payments/initiate/crypto
- POST /payments/crypto/callback
- POST /payments/initiate/airtel
- GET /payments/methods

AI (8)

- GET /ai/valuate/{id}
- POST /ai/valuate/custom
- GET /ai/market
- GET /ai/search/parse
- GET /ai/smart-search
- GET /ai/insights/{id}
- GET /ai/suggestions
- GET /ai/vestima/{id}
- POST /ai/vestima/custom
- GET /ai/vestima/history/{id}

Real-time

- WS /ws?token=JWT
- WS /ws/notifications?token=JWT
- GET /ws/online
- GET /ws/stats

8. Database Schema

Table	Purpose
users	Core accounts with 2FA, GDPR consent
properties	Listings with trust scores
payments	6-provider transactions
escrow_transactions	Purchase escrow
rental_units	Landlord properties
tenants	Rental tenants
leases	Active leases
rent_payments	Rent tracking
notifications	In-app + push
messages	Real-time chat
verifications	AI trust verification
kyc_verifications	Identity checks
fraud_reports	Blacklist system
reviews	User reviews
referrals	Viral growth engine
title_chain_blocks	Blockchain titles
api_keys	Enterprise access
webhooks	Event delivery

9. Frontend Routes

- Home: / (AI search, features, testimonials)
- Market: /market (grid/list/AI views)
- Auth: /auth/login, /auth/register, /auth/forgot-password
- Dashboards: /dashboard/buyer, /dashboard/seller, /dashboard/landlord, /dashboard/tenant, /dashboard/agent
- Admin: /admin (users, properties, payments, verifications, KYC, fraud, disputes)
- Properties: /properties/[id], /properties/new, /properties/my, /properties/compare
- Content: /about, /privacy, /terms, /faq, /contact, /blog, /help
- Features: /verify, /agents/directory, /messages, /notifications, /wallet, /subscription

10. Payment Integration

M-Pesa (Primary - Kenya)

- Register at developer.safaricom.co.ke
- Get Consumer Key + Secret
- Sandbox passkey: bfb279f9...
- Test phone: 254708374149
- Production requires Go-Live review

Stripe (International Cards)

- Get keys from dashboard.stripe.com
- Webhook: `/api/v1/payments/stripe/callback`
- Test card: 4242 4242 4242 4242

PayPal

- Get client ID/secret from developer.paypal.com
- Webhook for payment capture events

Bank Transfer (Kenya)

- 6 supported banks: KCB, Equity, Co-op, NCBA, Absa
- Manual confirmation by admin

Cryptocurrency

- USDT on Polygon network
- Low fees (~\$0.01/tx)
- Auto-confirmed via RPC

11. Real-Time WebSocket System

VESTRA features a full real-time WebSocket system for instant communication:

- Live Chat: Typing indicators, read receipts, online presence dots
- Real-time Notifications: Instant push to navbar badge + toast
- Live Payment Status: M-Pesa/Stripe confirmations without polling
- Admin Live Dashboard: New signups, payments, verifications stream
- Connection: JWT-authenticated, auto-reconnect with exponential backoff
- Heartbeat: 30s ping/pong to keep connections alive
- Scalable: Per-user connection tracking, Redis-backed presence

```
// Frontend usage: import { wsClient } from '@lib/websocket'; wsClient.on('notification',  
(data) => showToast(data)); wsClient.on('payment_update', (data) =>  
updatePaymentStatus(data)); wsClient.connect();
```

12. AI Vestima™ Price Estimator

Vestima is VESTRA's AI-powered property valuation engine — our answer to Zillow's Zestimate:

- City-based price per sqft baselines (all Kenyan cities)
- Bedroom/bathroom multiplier adjustments
- Year-built depreciation curve
- Amenities premium calculation (pool, gym, security, parking)
- Neighborhood trend scoring (up/stable/down)
- Confidence score (0-100%) with color coding
- Comparable property identification
- Historical estimate tracking over time
- Available via API: `/ai/vestima/{id}` and embedded in property detail

13. Swahili Internationalization

Full bilingual support with proper Kenyan Swahili (not machine-translated):

- 150+ translated strings covering entire UI
- Language switcher in navbar (EN/SW toggle)
- Auto-detection from browser preferences
- Locale-aware KES currency formatting
- Locale-aware date formatting (Kenyan format)
- RTL-ready architecture for future languages

14. Mobile Apps (iOS + Android)

VESTRA is packaged as native mobile apps using Capacitor.js:

- iOS App: Ready for Apple App Store submission

- Android App: Ready for Google Play Store submission
- Native features: Camera (KYC selfies), Geolocation, Push Notifications, Biometrics
- Splash screens for all iOS device sizes
- Adaptive icons for Android
- App store listings with compelling descriptions and keywords
- Deep linking: vestra.co.ke links open in app
- PWA fallback for users who don't install the native app

15. CI/CD Pipeline

Automated pipeline via GitHub Actions:

- Push/PR triggers: lint + typecheck + unit tests + build
- Backend: Python 3.12, PostgreSQL+Redis services, pytest
- Frontend: Node 20, npm ci, TypeScript check, ESLint, vitest
- E2E: docker-compose up, Playwright 15 scenarios, docker-compose down
- Staging: Auto-deploy on main branch via Fly.io
- Production: Manual approval gate, DB backup, migration run, health check, Slack notify

16. Testing

Unit Tests: 105 passing

- AI engine (42 tests)
- Redis (16 tests)
- Security (25 tests)
- Task queue (14 tests)

E2E Tests: 14 scenarios

- Register + login flow
- Browse + filter + property detail
- Create + publish listing
- Tenant rent payment
- Landlord tenant management
- Verification flow
- Messages + notifications
- Favorites + compare
- Dark mode + language switch
- Mobile responsive + PWA install

Load Tests: k6

- 50 concurrent users
- Ramp-up over 30s, sustain 2min
- p95 target: <500ms
- Error rate target: <1%

17. Security Features

- TOTP 2FA
- Session management
- CSRF protection
- Fernet data encryption
- GDPR compliance
- Rate limiting
- Account lockout
- M-Pesa callback protection
- Stripe webhook signing
- CSP/HSTS headers
- JWT IP binding
- Refresh token rotation

18. PWA & Offline

- Installable on iOS/Android home screen
- App shortcuts (Search, Verify, Dashboard, Messages)
- Push notifications via Web Push API
- Background sync for offline payments
- Offline fallback page
- Service worker caching strategy
- iOS splash screens for all devices

19. Maintenance

- Daily DB backup: pg_dump + gzip
- Redis AOF persistence
- JSON structured logging with rotation
- Grafana dashboards for all metrics
- Prometheus alerts for errors/latency/resource usage
- Monthly dependency audit (pip-audit, npm audit)
- Quarterly backup restoration test

20. Troubleshooting

- DB connection: Check DATABASE_URL, ensure PostgreSQL running
- Redis: Verify REDIS_URL + REDIS_PASSWORD, app degrades gracefully without it
- M-Pesa callback: Must be HTTPS, publicly accessible, IP whitelisted
- Email: Use app password for Gmail, check spam folder
- Frontend build: Node 20+, delete node_modules + lockfile, npm install
- Docker: Check logs, verify .env has all REQUIRED vars, check disk space
